빠른 기획 확정

게임 컨셉

복셀 그래픽의 2D 게임. (점프없음)

탑다운 슈터.

뉴클리어쓰론 + 체력대신에 복제인간들이 나온다.

이동과 조준이 별개.

빠르게 나올 수 있는 게임. <<

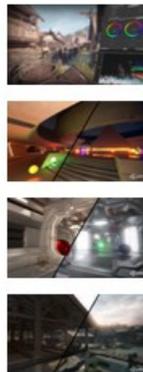

개발시작 - 12월 중순 ~ 말 사이에 시작해야 (x) 학교다니는 멤버가 한명뿐이다.

그래도 12월 중순까지는 초안이 나와줘야.

중간발표 - 1월 중순 / 1월말

목표 - 넥프 (2월말) -> 3월말~4월초 스팀

UNITY TECHNOLOGIES

Post Processing Stack

★★★★★ 198개 유저리뷰

Note: version 2.0 of the post-processing stack is current

The new Unity post-processing stack is an über effect that has several advantages :

- Effects are always configured in the correct order.
- It allows combination of many effects into a single pass.
- It features an asset-based configuration system for each effect.
- All effects are grouped together in the UI for a better user experience.

It comes with the following effects :

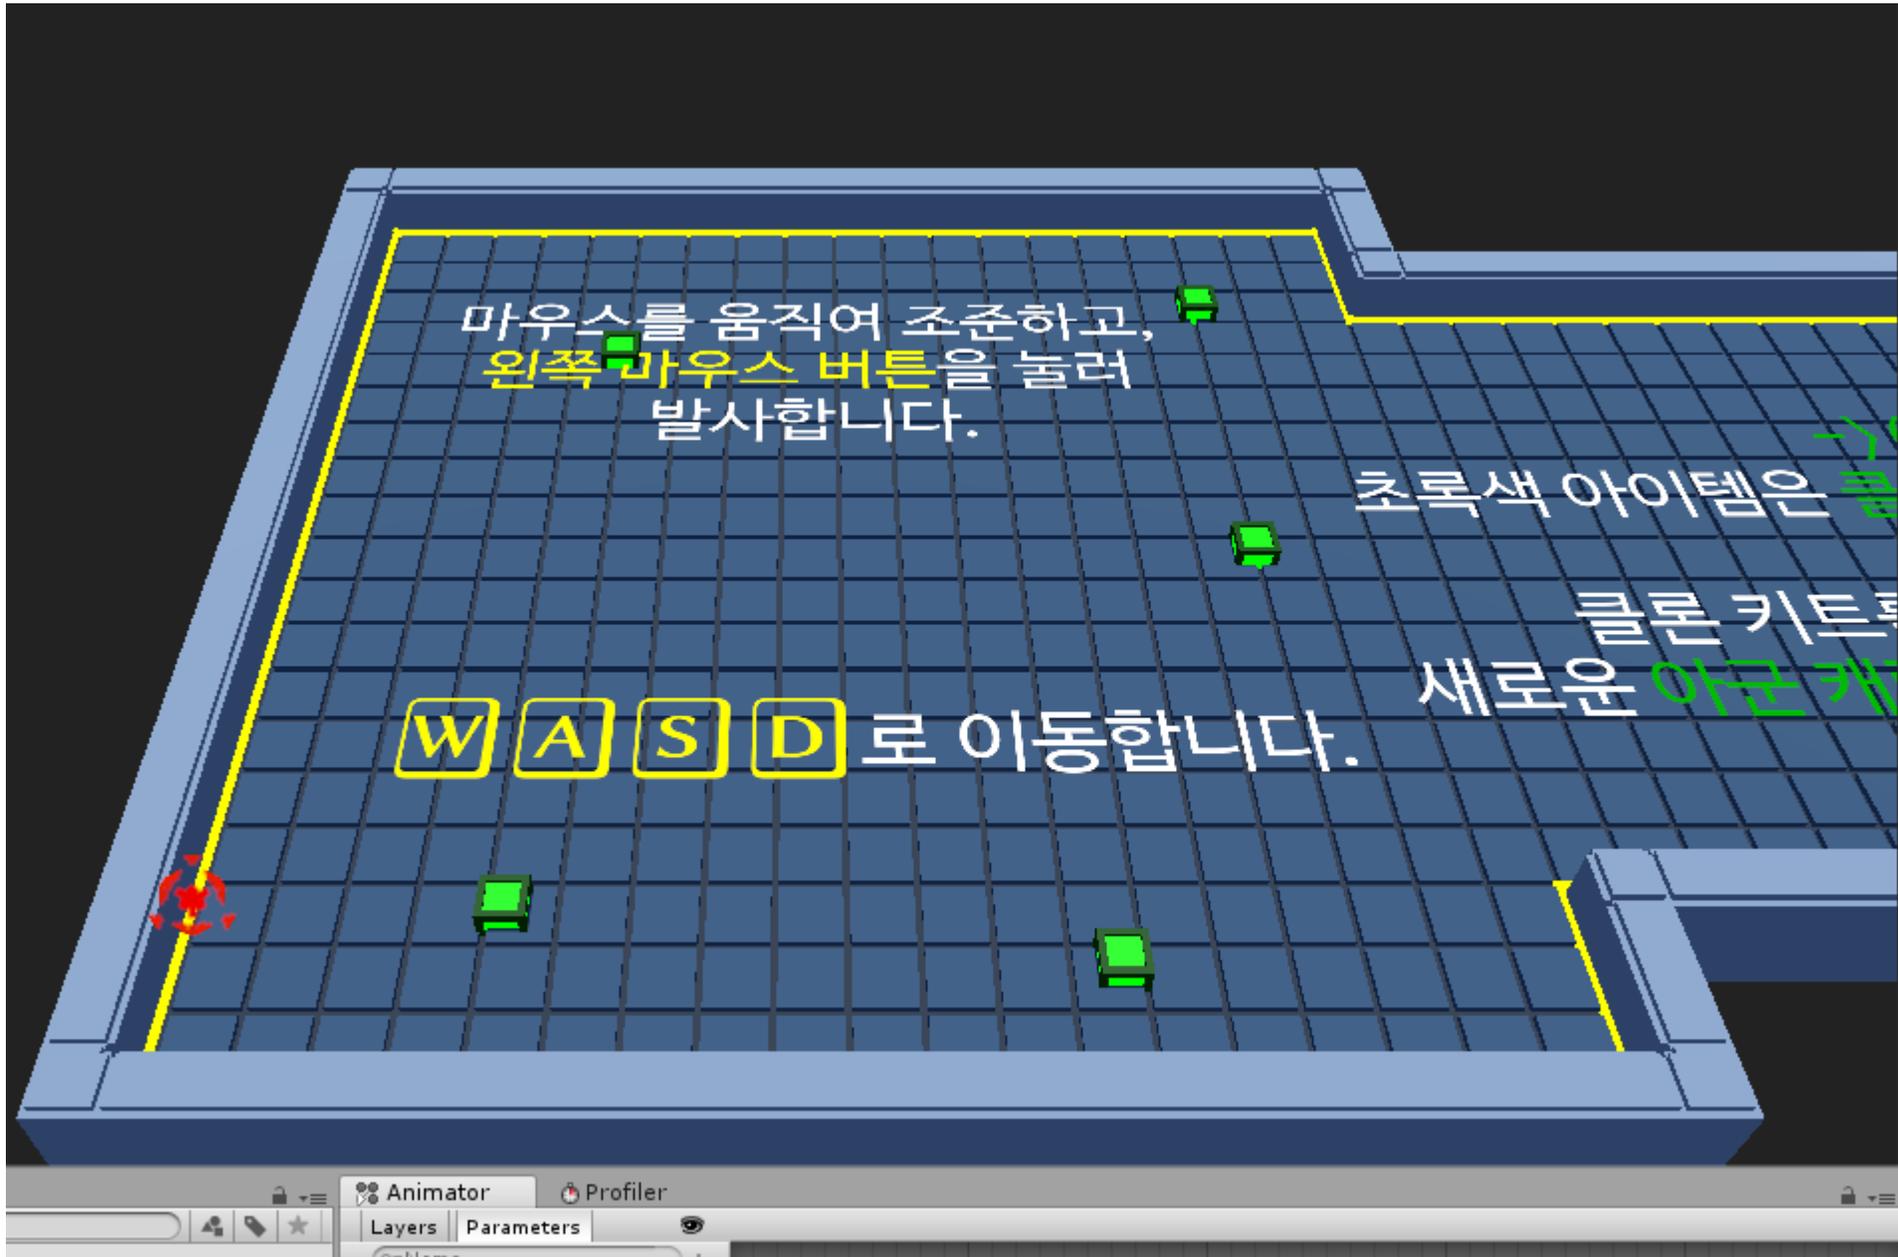

- Antialiasing (FXAA, Temporal AA)
- Ambient Occlusion
- Screen Space Reflections

Cinemachine

★★★★★ 68개 유저리뷰

Cinemachine is unified procedural camera system for in-game cameras, cinematics and cutscenes, for eSports solutions.

If you have a camera in your project, you'll benefit from Cinemachine being your camera system.

Cinemachine includes these components:

Procedural composition cinematically tracks and composes whatever target you define, be it an object or camera operator which procedurally films the actions based on your direction of where you want it on screen.

Follow modes mount cameras to objects with real-time offset tuning and per-axis dampening control options for following based on world angle, position delta and more.

Clear Shot Real-time shot evaluation. Setup any number of cameras and give them a priority. If the ci

먼저 만들고,
그 뒤
최적화하자

- 계획만 하다 보면 구현을 못 한다
- 일단 만들고 최적화를 해도 늦지 않다
- 사실 최적화를 안 해도 된다

잘 안 된 점

기획/
프로그래밍/
모델링 사이의
지연

- 의견교환이 느렸다
- 더 빠른 의견교환/rapid prototyping의 필요성
- 동아리 프로젝트라서 한계도 있는 듯

(거의)온라인
only 회의

회의가 온라인으로만 진행되다보니
참여도가 떨어졌다

말이 잘 나오지 않는다

피드백이 느리다

회의는 오프로 하고 기록을 동시에
남기는 것이 좋다

실제 맵 구현이 늦어짐

map 디자인 레이아웃 완성

프로그래밍 인원 부족

- 구인을 처음부터 잘 했어야 하나...
- 어느 정도는 어쩔 수 없는 것 같습니다.

총평

- 많은 것을 배울 수 있었던 프로젝트
- 새로운 요소를 여럿 도입했던 프로젝트
- 팀원이 더 있었다면 좋았을 프로젝트
- 팀원간의 소통이 더 필요했던 프로젝트
- 그래도 재미있게 일 할 수 있었던 프로젝트
